

NRX SOLIDIFIES ITS LEADERSHIP POSITION IN THE ASSET INFORMATION MANAGEMENT (AIM) SOFTWARE MARKET WITH THE RELEASE OF ASSET HUB 5.5

TORONTO, CANADA – January 20, 2010 – NRX Global Inc. has released the latest version of its flagship Asset Information Management (AIM) solution; Asset Hub 5.5. This newest and most powerful version of the Asset Hub contains many new and innovative features that further reinforce NRX's leadership position in the AIM market.

Asset Hub 5.5 includes support for two new languages; Dutch and French, as part of NRX's ongoing global growth. These two new languages bring the total number of supported languages to eight. NRX has added new and improved support accessibility guidelines to make the application more user friendly for individuals with disabilities. Other enhancements include improved application speed and performance for both end users and systems administrators. These performance enhancements further reduce the time and cost to implement and operate the NRX Asset Hub solution. Improvements have also been made to enable seamless interoperability between NRX Asset Hub and Enterprise Content Management (ECM) systems.

There is also exciting news for Asset Hub customers running SAP. Business Content for the SAP Portal will be available to SAP customers who purchase NRX Asset Hub 5.5. This business package will bundle a set of i-Views that enable users to easily integrate components of NRX Asset Hub into the SAP Netweaver Portal.

Effective immediately, in combination with the Asset Hub 5.5 release, the NRX Asset Center solution has been rebranded as the NRX Asset Hub for both SAP and non-SAP customers.

"Asset Hub 5.5 is a very important release for NRX extending the solution's reach to an ever growing community of global users. As the complexity and scale of our customer's projects and facilities continues to grow, the enhancements delivered through the latest version of NRX Asset Hub will further reduce the time, cost, and risk associated with creating, managing, and sustaining the vast amount of critical asset information required to start-up, commission, and operate their facilities globally," said Jeff Bonnell, Vice President of Services and Product Management.

About NRX

NRX Global Inc. is the global market leader in Asset Information Management (AIM) software. Leading companies in asset intensive industries use NRX solutions to dramatically reduce the time and cost needed to achieve full production on complex capital projects. For critical assets that are in operation, NRX solutions enable clients to significantly increase asset productivity and materially reduce operating, safety, and compliance risk and costs over the operating life of the assets.
