

FOR IMMEDIATE RELEASE

SILICON VALLEY AMBASSADOR TO RUN NRX GLOBAL

Respected Canadian Investors Michael DeGroot and Ron Joyce Head New Financing of Enterprise Software Leader

TORONTO, CANADA – September 28, 2009 - NRX Global Inc. has appointed the Honorable Gregory W. Slayton as President, Chief Executive Officer and member of the Board of Directors. Mr. Slayton served as the United States' senior diplomat to Bermuda from 2005 - 2009 under both the Bush and Obama administrations after a long and distinguished career in Silicon Valley.

Backing the new CEO, esteemed Canadian business leaders Michael DeGroot Sr. and Ron Joyce have each invested significant new capital into NRX Global Inc. The capital infusion will help NRX Global Inc. solidify its leadership position in the rapidly growing Asset Information Management (AIM) segment of the enterprise software industry. Michael DeGroot Sr., one of Canada's most successful and best known entrepreneurs, will be joining NRX's Board of Directors. These events occurred in conjunction with the acquisition by NRX Global Inc. of the assets of NRX Global Corp. effective September 1, 2009.

CEO Slayton stated "It is an exciting time at NRX, with the company focused on growing its leadership position in the Asset Information Management market. The fact that two of Canada's most respected business leaders have decided to back NRX Global Inc. is further endorsement of the major market opportunity before us. We could not ask for better equity partners than Michael DeGroot and Ron Joyce. Now it is up to us, the management and staff of NRX Global Inc., in conjunction with our partners world-wide, to make this opportunity reality."

Ron Joyce, co-founder of Tim Horton's and one of Canada's most successful entrepreneurs, commented "NRX Global helps some of the world's most sophisticated companies streamline their asset management processes - and save huge amounts of time and money." Slayton added, "NRX's easy to use software helps leading companies in asset intensive industries world-wide to better manage their largest plants, refineries, and mining operations, leading directly to higher revenues, lower costs and better safety and compliance records."

Before becoming a senior US diplomat, Mr. Slayton spent 12 years in Silicon Valley as a CEO and venture capitalist. As an investor and advisor, Mr. Slayton served on the board of advisors of Google and other high tech leaders. As CEO, Mr. Slayton turned around a number of well known tech companies, including MySoftware (the 9th best performing stock on US capital markets in 1999). Mr. Slayton's turnaround work is the subject of a number of Harvard Business School case studies and Wall Street Journal features. Mr. Slayton is himself an honors graduate of both HBS and Dartmouth College and a former consultant with McKinsey and Company.

About NRX

NRX is the market leader in Asset Information Management (AIM) Solutions. Leading companies around the world are using NRX's Software to dramatically reduce the time and cost needed to achieve full production on complex capital projects. Once the assets are in operation, NRX's AIM Solutions provide for improved productivity and reduced operational, safety, and compliance risk over the full operating life of these critical assets.
